

Feoktistov Dmitriy S. - Junior Javascript Developer

feoktistovdmitriy@gmail.com, +7 (913) 878-20-53, Russia, Tomsk, Irkutsk trakt 33-1
[Github](#), [LinkedIn](#)

Summary:

I study Javascript development from february of 2018 when I was accepted as student at Udacity by Google Developers Scholarship Challenge. I enjoy building websites, mobile apps and user interfaces, but also would like to try building REST API's and learn more about backend possibilities of Javascript. I have very little experience in commercial web-development, though I learn really fast. I am aiming to leverage my skills to successfully fill the Junior Javascript Developer role at your company.

Employment history:

Senior research fellow at Tomsk State University, Tomsk, Russian Federation

September 2013 — present

Preparing manuscripts, reports and meeting presentations.

Making experimental designs and conducting experiments in molecular phylogeny of plants.

Analysing the data obtained from experiments by statistical methods.

Education:

Ph.D. in biology, Tomsk State University, Tomsk

September 2013 - May 2017

During my Ph.D. studies I was mainly focused on molecular phylogeny and taxonomy of plants.

Front-End Web Developer Nanodegree, Udacity

February 2018 - July 2018

During this courses I studied key front-end technologies, including popular front-end framework (React).

Key-skills:

Linux, JavaScript, ES6, ES7, Typescript, React.JS, react-native, Redux.js(redux-saga, redux-thunk), Gatsby.js, REST API, Express, MongoDB, HTML5, CSS3, SCSS, POSTCSS, Photoshop, GIT, webpack, gulp, grunt.

Languages: russian — native, english — upper-intermediate.
